

Instrument Collection – DTE BASELWORLD Novelty 2014

Arnold & Son Celebrates 250th Anniversary with Unique DTE: Double Tourbillon Escapement Dual Time Watch

Deftly blending its rich British heritage and superior watchmaking ingenuity, Arnold & Son celebrates its 250th anniversary with a superb timepiece that reflects its famed past with a visionary look forward. The unique and impressive Double Tourbillon Escapement Dual Time watch – DTE – is a marvel of mechanical mastery and aesthetic elegance.

DTE

Exclusive Arnold & Son mechanical double tour billon movement A&S8513, hand-wound, domed and white lacquered dials, 18-carat red gold case, diameter 43.5 mm

Renowned for its innovative technology and amazing technical prowess Arnold & Son continually brings horological excellence to new heights. Such is the case with the DTE, which joins the brand's much-coveted Instrument Collection, whose signature is in-house manufactured movements inspired by the timepieces produced during the second part of John Arnold's life when he and his son, John Roger, dedicated themselves to the quest for absolute precision.

Arnold & Son can easily be considered the father of modern marine timekeeping. Because of its technical superiority in watchmaking, Arnold & Son developed and produced chronometers that solved the 18th-century problem of determining longitude at sea (also, thereby establishing themselves as official suppliers to the Royal Navy). Clearly one of the greatest watchmakers in history, John Arnold shared his knowledge and passion with Abraham-Louis Breguet. Evidence of their partnership is Breguet's first ever tourbillon cage (No 169) mounted in John Arnold's No. 11 movement, a watch that can be found today in London's British Museum.

This year, as Arnold & Son honours its 250 years of watchmaking heritage, it celebrates by unveiling the perfect dual time Double Tourbillon Escapement watch. The DTE is a masterpiece of symmetry, balance and three-dimensional beauty combined with technical foresight and ultimate performance precision. The watch, powered by the all-new mechanical hand-wound calibre A&S8513, brings the centuries-old tradition of double movements back to life – in 21st century style. It features two separate time zone displays – each of which can be set independently from the other thanks to dedicated setting mechanisms. Each has its own gear train and its own tourbillon escapement.

In addition to the double tourbillon escapement and the dual dial/dual time indication, the watch is incredibly efficient in that it not only offers local time in hours and minutes, but also offers hours and minutes of a second time zone to be set separately – thereby enabling the wearer to have precise time in zones that differ from Greenwich Mean Time by quarter- or half-hour increments. The double barrels of the watch offer a superb 90 hours of power reserve.

In typical Arnold & Son style, the watch is incredibly detailed and features superlative *Haute Horlogerie* finishing. The dial side of the timepiece offers symmetry and depth. It features two white lacquered domed dials – one each at 12 o'clock and 6 o'clock – for the dual time displays. The two tourbillon escapements are harmoniously balanced at 3 o'clock and 9 o'clock and seem to float over the dial thanks to their alluring raised 18-carat red gold bridges. The backdrop for these double lacquered dials and double tourbillon escapements is a magnificently decorated vertical *Côtes de Genève* stripes plate. The two crowns – one each for setting the local and the home time – are located at 2 o'clock and 8 o'clock, and the two mainsprings are wound using the crown at 2 o'clock.

The 43.5 mm DTE is created in 18-carat red gold. The white dials (with Roman numerals in one and Arabic numerals in the other) are accented with blued hour and minute hands. The back of the watch features a transparent sapphire crystal for viewing the splendidly decorated nickel-silver movement. In all, this masterpiece of tradition and vision, of technology and elegance reinforces the watchmaking prowess of Arnold & Son, and elevates its accomplishments to all new heights.

Main technical characteristics:

Calibre: A&S8513

Exclusive Arnold & Son mechanical double tourbillon movement, hand-wound, 42 jewels, diameter 37.3 mm, thickness 8.35 mm,

power reserve 90 h, double barrel, 21,600 vibrations/h

Functions: local hours and minutes, GMT hours and minutes, double tourbillon

Movement decoration: nickel-silver movement, rhodium treated with superlative Haute

Horlogerie finishing: hand-chamfered bridges and polished edges, fine circular graining and *Côtes de Genève rayonnantes*, plate dial side with *Côtes de Genève*, circular satin-finished wheels with hand-chamfered and polished edges, blued screws with bevelled and

mirror-polished heads

<u>Tourbillon:</u> 18-carat red gold bridges, satin-finished and mirrorpolished surfaces with hand-chamfered and polished edges Hand-chamfered and mirror-polished tourbillon cages

Dial: domed and white lacquered

Case: 18-carat red gold, diameter 43.5 mm, cambered sapphire with anti-

reflective coating on both sides, case back see-through sapphire,

water-resistant to 30 m

Strap: Hand-stitched brown or black alligator leather

Limited edition: 250th Anniversary, 28 timepieces
