HORNET WORLD TIMER

Taking the sting out of technical timekeeping

Clearly displaying its sophisticated nature with no less than six hands and pointers, radiating from the dial centre like the blades on a propeller, and indicating all manner of useful information, the Hornet World Timer from Arnold & Son nonetheless manages to maintain the brand's trademark clarity and user-friendly handling – which means you don't need to be a qualified fighter pilot to operate its multiple functions!

The beautifully rounded 18-carat rose gold or stainless steel case is immediately distinguished by its three crowns and pushpieces symmetrically arranged at 9 and 10 o'clock on one side and 2 and 3 o'clock at the other, thus immediately setting the pragmatic operational tone for this high-flying model. The dial plays on contrasting colours, clearly differentiated hands, alternating Arabic numerals and hour-markers, and a mixture of pointer-type and window displays, in order to distinguish between the various items of information provided.

Because schedules and planning are more important than ever in today's busy lifestyle, whether to meet professional demands or facilitate leisure pursuits, the double-disc date display and the month circle help keep track of this ever-useful data. Symbolising the global village, the sophisticated twin-time running indication features two hands turning simultaneously, and the city of London is highlighted in red among the other cities appearing on the GMT ring, a nod in direction of the brand's British origins.

Moreover, this function offers the unusual possibility of setting one of the twin time zones to take account of half time-zones in parts of the world such as India. What's more, if desired, it can also display the mean solar time in a specific location by means of a dedicated golden sun-tipped hand. And finally, to keep the wearer in touch with a truly 'universal' time beyond earthly time zones, the equation of time is shown on a triangular white segment.

Doubtless destined to create quite a buzz in the lofty stratosphere of technical contemporary timepieces, the Hornet World Timer is a complex instrument that prides itself on functional simplicity, enabling quick and easy readings of just about everything its wellinformed owner could wish to know from his watch.

ARNOLD & SON
LONDON 1764

HORNET WORLD TIMER

Main technical characteristics:

Calibre:	A1766
	Exclusive Arnold & Son mechanical movement, self-winding, 41 jewels, diameter 38.55 mm, thickness 7.05 mm, power reserve 42 h, 28'800 vibrations/h
