Royal Collection HMS1

Arnold & Son announces two spectacular new references as fitting additions to the HMS1 line

The Royal Collection from Arnold & Son consciously references the magnificent timepieces made by John Arnold in his fledgling years as a watchmaker for King George III and members of the monarch's court. The timepieces were distinguished by their elaborate decoration, intricate workmanship and ingenious mechanical sophistication. To complement the collection, Arnold & Son is proud to unveil two beautiful new models that sit firmly within the inimitable English watchmaking tradition.

HMS1

Exclusive Arnold & Son mechanical movement A&S1001, hand-wound,
silvery-white *guilloché* dial, 18-carat rose gold or 18-carat white gold case, diameter 40 mm

© Arnold & Son

Both of the new timepieces feature gorgeous, silvery-white *guilloché* dials in two distinct patterns. These combine with the indices, starkly three-dimensional hands, and recessed subdial to create a spectacular illusion of depth that is in sharp contrast to the ultra-slim case. Housed inside the case is an in-house A&S1001 nickel silver movement, just 2.7 mm in height and decorated with *Côtes de Genève rayonnantes* – a particularly apt choice of ornamentation because the iridescent reflections mirror those of the dial. The rhodium treated calibre is meticulously fashioned, featuring *Haute Horlogerie* finishing and manually chamfered bridges with polished edges as well as blued screws and fine circular graining. Secured by a brown or black alligator strap, the two new HMS1 references are available in 18-carat rose gold and 18-carat white gold, and are also available with a diamond-set bezel.

A&S1001

Exclusive Arnold & Son mechanical movement A&S1001

© Arnold & Son

All timepieces in the HMS1 line feature a classically styled 40 mm case in white gold, rose gold or stainless steel, with a see-through back cover and water-resistance to 30 metres. The hand-wound movements have double barrels that generate a power reserve of over 90 hours with more constant force and hence greater accuracy throughout the watch's run time. The line is available in a range of dial colours and with various finishes, depending on the model.

Main technical characteristics:

Calibre:	A&S1001
	Exclusive Arnold & Son mechanical movement, hand-wound, 21 jewels, diameter 30 mm, thickness 2.7 mm, power reserve 90 h, double barrel, 21,600 vibrations/h
Functions:	hours, minutes, small seconds at 6 o'clock
Movement decoration:	nickel-silver movement, rhodium treated with <i>Haute Horlogerie</i> finishing: hand-chamfered bridges with polished edges, fine circular graining and <i>Côtes de Genève rayonnantes</i> , blued screws with bevelled and mirror-polished heads
Dial:	silvery-white <i>guilloché</i>
Case:	18-carat rose gold or 18-carat white gold, diameter 40 mm, cambered sapphire with anti-reflective coating on both sides, see-through sapphire case back, water-resistant to 30 m
Strap:	hand-stitched brown or black alligator leather
References:	1LCAP.S10A.C110A, 18-carat rose gold 1LCAW.S09A.C111W, 18-carat white gold
