Instrument Collection – Time Pyramid (Black Edition)

**Arnold & Son introduces the Time Pyramid Black Edition, A neo-classical interpretation of a skeleton watch unlike any other.**

Arnold & Son has been at the forefront of creating unique and truly original skeleton timepieces; a number of which have become iconic symbols of contemporary *haute horlogerie* with classical inspiration.

Now, Arnold & Son offers a contemporary yet timeless execution its most outstanding skeleton watch, the Time Pyramid Black Edition in striking black and gold tones.

ARNOLD & SON

1764

An object of symmetry and pure mechanical opulence, the Time Pyramid is a skeleton timepiece with a unique form. Seemingly floating between two sapphire crystals, the Time Pyramid is a masterful rendition of technical prowess and unparalleled elegance.

Inspired by the regulators created by John and Roger Arnold over two hundred years ago, as well as by antique British skeleton clocks, the skeletonized caliber A&S1615 is built in a unique format, with the balance wheel at twelve o'clock, and at the opposite end of the movement at six o'clock, two mainspring barrels that supply the hand-wound caliber with an amazing 90 hours of power reserve, and provide a more constant force to the wheel train.

British skeleton clock, chain driven fuse,  
England, 1830-1845

The gear train runs vertically in a linear format connecting the two barrels at six o'clock to the balance wheel at twelve o'clock, and endowing the movement with its pyramid structure. The bridges are designed so that all of the wheels, the two mainspring barrels, the escapement and balance wheel are all magnificently visible from the dial side.

Additionally, the movement is fitted with two power reserve indicators - one each on either side of the linear gear train - to display the energy level for each barrel separately. The power reserve hands indicate the reserve level via graduated dots (that are printed under the top sapphire crystal) in an arc format, and demonstrate how one barrel transfers energy to the second one when needed.

ARNOLD & SON

1764

Essentially, as the first barrel winds the second one, the power reserve indicator of the first barrel goes down, while the second one goes up - making for an accurate and intriguing readout.

**Time Pyramid – Black Edition**

In the Time Pyramid Black Edition, the emphasis has been placed on the moving parts of the movement. Housed in a 44.6mm Stainless Steel case with a black DLC coating, the movement has been reimagined with a blend of muted black and warm rose gold tones, highlighting the movement's unique architecture while playing with light in a most fascinating manner.

ARNOLD & SON

1764

The movement's main plate and bridges are treated in black ADLC, while still retaining classical *haute horlogerie* decoration such as *Côtes de Genève* strips and chamfered, polished edges. The various wheels of the symmetrical gear train as well as the barrels are given a rose gold treatment, as are all the hands and the frame holding the sapphire hours and minutes dial.

**A&S1615**

Manufacture Arnold & Son caliber, hand-wound, diameter 37.60 mm,

Completing the look of the Time Pyramid Black Edition's dark allure, the watch is set on a hand-stitched black alligator leather strap, with a black DLC treated steel tang buckle matching the case.

The Time Pyramid Black Edition is a limited edition of 50 pieces.

**Recommended Retail Prices:**

Stainless Steel with black DLC coating case, CHF 28'700 (VAT excl.)
